OUR MISSION

The mission of the AHPC Certification Program is to standardize and define the skills and knowledge required of individuals and organizations offering animal hospice and palliative care.

The program advances both patient and family care through a structured, competency-based training program, ensuring those certified are educated in providing an appropriate standard of care in their respective professional fields.

The AHPC Certification Program prepares service providers to offer pets and their families the highest level of support that falls within their scope of expertise.

The program includes fundamental concepts as well as addresses the unique challenges of veterinary medical care, nursing care, and caregiver support as related to the interdisciplinary animal hospice model.

Registration and classes begin in June

The AHPC Certification Program, offered through the International Association for Animal Hospice and Palliative Care (IAAHPC), will continue to establish best practices for hospice and palliative care services and will uphold a level of excellence achieved by those individuals who have obtained certification.
